Using the Check Eligibility tool

Understanding the tool output

Private Offers eligibility

Microsoft

Eligibility for Private Offers can depend on the tenant, subscription, billing account, or billing profile. Make sure to run this check on the account of the user who will be deploying the products. [Learn more](#)

Tenant ID

[Redacted]

General Information

You have permissions for 1 subscription(s).

You can deploy Marketplace products on 0 subscription(s). [Learn more](#)

Your subscriptions belong to a single billing account.

Your eligibility check results

No Cloud Solution Provider (CSP) subscription found (CSP subscriptions cannot deploy Private Offers).

Private Marketplace is not enabled on your tenant.

No Azure policy found blocking marketplace purchases.

Some subscriptions couldn't be checked because they require permissions to run an eligibility check.

Some of your settings may be blocking Private Offers. Download the eligibility report for more details.

Download eligibility report

Download a CSV file with details of the subscriptions and roles that have permission to deploy Private Offers. This includes only subscriptions selected in the [global subscriptions filter](#).

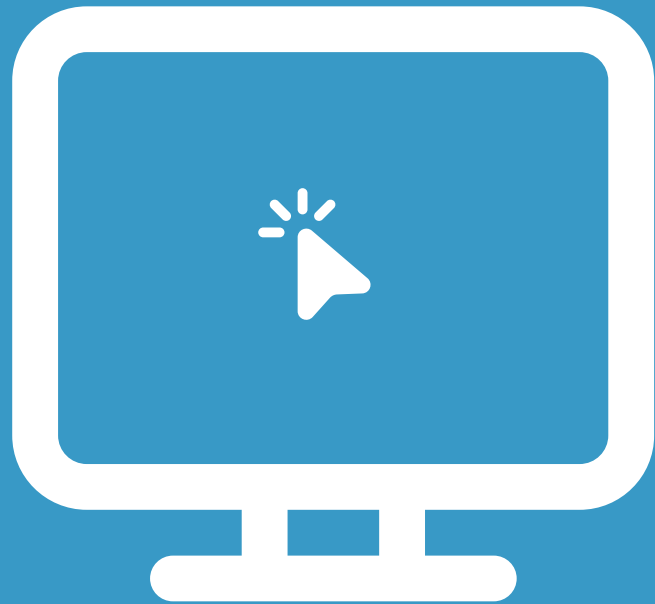

[Download report](#)

[Check again](#)

Report output

IsAllowedByAzurePolicy	IsCspAccount	IsPrivateMarketplaceEnabled	IsEA	EaMarketplacePurchaseEnabled	CanDeployPrivateOffers
TRUE	FALSE	FALSE	TRUE	Unable to access data.	FALSE
